SOVIET MATHEMATICS — DOKLADY

INDEX OF AUTHORS

Volume 41 July–December 1990 Russian Toms 310–312

Abdullaev, Ya. Yu. and Dzhabrailov, A. D. *Imbedding theorems for function spaces normed by means of a set of multiple differential-difference characteristics* 76

Adaricheva, K. V. and Gorbunov, V. A. *The structure of finite atomistic lattices of quasivarieties* 80

Agrachëv, A. A. and Gamkrelidze, R. V. *Variation of "time change" in optimal control* 227

Amirov, A. Kh. *Integral geometry and the problem of recovering a Riemannian metric* 514

Andrunakievich, A. V. See Andrunakievich, V. A.

Andrunakievich, V. A. and Andrunakievich, A. V. *Regularity of a ring relative to right ideals* 35

Anikonov, Yu. E. *Formulas in multidimensional inverse problems for evolution equations* 385

Artyushin, A. N. *Variational inequalities for the wave equation with a constraint on the solution* 320

Aseev, V. V. *Plane mappings preserving moduli* 141

Askhabov, S. N., Karapetyants, N. K., and Yakubov, A. Ya. *Integral equations of convolution type with a power nonlinearity, and their systems* 323

Averbakh, I. L. *On saddle points of the Lagrange function of the m-dimensional knapsack problem* 32

Bagirov, È. B. *Lower bounds for the "tails" of distributions of certain functions of normally distributed random variables* 261

Bakaev, N. Yu. and Bakushinskiĭ, A. B. *On the theory of approximate methods for solving an ill-posed abstract Cauchy problem* 475

Bakanov, G. B. See Romanov, V. G.

Bakhvalov, N. S. and Knyazev, A. V. *A new iterative algorithm for solving problems of the fictitious flow method for elliptic equations* 481

Bakushinskiĭ, A. B. See Bakaev, N. Yu.

Baladze, È. D. *Solution of the problem of Szőkefalvi-Nagy for zonoids* 1

Baris, Ya. S. and Lykova, O. B. *Integral manifolds and the reduction principle in stability theory* 232

Belousov, A. A. See Chikriĭ, A. A.

Bil'man, B. M. and Dzhangibekov, G. *On conditions for the Noether property and the index of some singular two-dimensional integral equations* 389

Bitsadze, A. V. *On the Neumann problem for harmonic functions* 193

Bogachev, V. I. *The distributions of analytic functionals of random processes.* 517

Bogolyubov, N. N. See Prikarpat·skiĭ, A. K.

Boĭmatov, K. Kh. *Spectral asymptotics of pseudodifferential operators* 196

Bularas [Boularas], D., Vulpe, N. I., and Sibirskiĭ, K. S. *The problem of a center "in the large" for a general quadratic system* 287

Chernyshov, K. I. *The method of standard splitting of singularly perturbed differential equations* 380
Chikriĭ, A. A. and Belousov, A. A. *The controllability problem for conflict-controlled processes* 560
Churbanov, V. V. *An example of a reaction system with diffusion in which the diffusion terms lead to explosion* 191
Danilaev, P. G. See Klibanov, M. V.
Diblik, Ĭ. [J. Diblík] *On the applicability of Ważewski's method for differential equations with delay* 54
Din′ Zung [Dinh Dung] *The Whittaker-Kotel′nikov-Shannon theorem, ε-entropy, and ε-dimension* 446
Do Kong Khan′ [Đỗ Công Khanh] *Minimality of passive scattering systems in cascade connection* 291
Donin, I. F. *On plethysm of representations of symmetric groups* 144
Dovzhenko, I. N. and Tsekanovskiĭ, È. R. *Classes of Stieltjes operator-valued functions and their conservative realizations* 201
Dzhabrailov, A. D. See Abdullaev, Ya. Yu.
Dzhangibekov, G. See Bil′man, B. M.
Dzhrbashyan, M. M. and Karapetyan, A. O. *Integral representations in the generalized unit disk* 400
———. *Integral representations in the generalized upper half-plane* 430
Dzhuraev, A. *On elliptic systems in the plane with discontinuous coefficients, and their applications* 490
Egorychev, G. P. *Mixed discriminants and parallel addition* 451
Eremenko, A. È. and Sodin, M. L. *The second fundamental theorem of value distribution theory of meromorphic curves for nonlinear divisors* 359
Evseev, E. G. and Semenov, A. Yu. *A method for numerical solution of the equations for the dynamics of thin shells, based on separating out rapidly oscillating components* 118
Fedorov, F. I. *The metric tensor and tetrads* 438
Gabidzashvili, M. A. and Kokilashvili, V. M. *Weighted estimates for fractional integrals on curves* 5
Gabov, S. A. *On an abstract Cauchy problem arising in the theory of internal waves in the presence of flotation* 50
Gamkrelidze, R. V. See Agrachëv, A. A.
Gasymov, M. G. and Levitan, B. M. *On the expansion in products of special solutions of two Sturm-Liouville equations* 113
Gavrilenko, Yu. V. *Applications of Cooper algebras to tail recrusion theory in logic programming* 501
———. *Recursion and iteration on Cooper algebras* 425
Golodets, V. Ya. and Sinel′shchikov, S. D. *Amenable ergodic actions of groups, and images of cocycles* 523
Goncharov, A. B. *The Weil representation and hypergeometric functions associated to a Lagrangian Grassmannian* 395
Gorbachuk, M. L. and Matsishin, I. T. *The behavior at infinity of solutions of a first-order parabolic differential equation in Banach space* 442
Gorbunov, V. A. See Adaricheva, K. V.
Islomov, B. See Salakhitdinov, M. S.
Ivriĭ, V. Ya. *Sharp spectral asymptotics for the Dirac operator with a strong magnetic field* 122
Kabanikhin, S. I. See Romanov, V. G.

Kabanov, Yu. M. and Pergamenshchikov, S. M. *On singularly perturbed stochastic equations and partial differential equations* 328
Kadets, V. M. *Rearrangements of series of functions and various forms of convergence* 8
Kapitonov, B. V. *On the decay as $t \to \infty$ of solutions of an exterior boundary value problem for a strongly hyperbolic system* 236
Kaplan, A. A. *On the convergence of methods of solving variational inequalities with weakly coercive operators* 11
Kapustin, N. Yu. *On solvability in the class L_2 of a characteristic problem for a hyperbolic equation with degeneration of order* 295
Karapetyan, A. O. See Dzhrbashyan, M. M.
Karapetyants, N. K. See Askhabov, S. N.
Khakimdzhanov, Yu. B. *On characteristically nilpotent Lie algebras* 105
Khimshiashvili, G. N. *On the Riemann-Hilbert problem for a compact Lie group* 165
Khrustalev, M. M. and Savastyuk, S. V. *Conditions for optimality of stochastic systems of diffusion type in problems with constraints on the control-observation process* 256
Khudaverdiev, F. K. See Maksudov, F. G.
Kir′yanova, L. V. and Rotar′, V. I. *On the rate of convergence in a limit theorem for martingales* 332
Kleĭmenov, A. F. *On the cooperative theory of coalitionfree positional differential games* 409
Klibanov, M. V. and Danilaev, P. G. *On the solution of coefficient inverse problems by the method of quasi-inversion* 83
Knyazev, A. V. See Bakhvalov, N. S.
Kobel′kov, G. M. *A priori estimates for elliptic equations, and iterative methods* 175
Kochetkov, D. V. *On monotone invariant recognition algorithms* 370
Koĭbaev, V. A. *Subgroups of* $\mathrm{GL}(2, \mathbf{Q})$ *containing a nonsplit maximal torus* .. 414
Kokilashvili, V. M. See Gabidzashvili, M. A.
Kolyadin, V. L. and Kravchenko, V. F. *On a statistically optimal solution of operator equations when the initial data is finite-dimensional* 88
Komrakov, B. P. *Maximal subalgebras of real Lie algebras and a problem of Sophus Lie* 269
Kondrat′ev, V. A. and Oleĭnik, O. A. *On Hardy and Korn inequalities for a certain class of unbounded domains, and their applications in elasticity theory* 527
Korobov, V. I. and Sklyar, G. M. *On the set of bounded positional controls solving the synthesis problem* 532
Korotkiĭ, A. I. *On integral representation of G-limit operators* 178
Kosman, E. G. *Isomorphisms of Sylow p-subgroups of a bounded linear group* 62
———. *Structuring of matrices* 152
Kostochka, A. V. *On the maximal cardinality of the boundary of a Sperner family* 92
Kotlyarov, V. P. *Decomposition of initial data of steplike type in the modified Korteweg-de Vries equation* 510
Kravchenko, V. F. See Kolyadin, V. L.
Kritskov, L. V. *On necessary conditions for the basis property in $L_p(G)$ of a system of root functions of the one-dimensional Schrödinger operator* 374
Krysov, Yu. A. See Ven, V. L.
Kufarev, B. P. *Boundary correspondence theorems for L_n^1-extendible homeomorphisms of domains $G \subset \mathbf{R}^n$, compactified by means of the metric ρ_G* ... 536

Kurzhanskiĭ, A. B. and Nikonov, O. I. *On the problem of synthesizing control strategies. Evolution equations and multivalued integration* 300
Laptev, G. I. *Solvability of some classes of quasilinear Volterra parabolic equations* 335
Le Khong Van [Le Hong Van] *Each globally minimal surface in a compact homogeneous space has an invariant calibration* 66
Lelikova, E. F. *On the asymptotics of the fundamental solution of a parabolic equation in the critical case* 456
Lepin, L. A. *Spectra of eigenfunctions of a semilinear heat equation* 340
Levitan, B. M. See Gasymov, M. G.
Logvinenko, V. N. *A "multiple" analogue of a theorem of Cartwright for entire functions of several variables* 343
Lokshin, M. D. *On game control under an integral constraint on the noise* 241
Lomov, S. A. *Refinement of the notion of asymptotic series for singularly perturbed problems* 156
Lychagin, V. V. See Zil′bergleĭt, L. V.
Lykova, O. B. See Baris, Ya. S.
Magerramov, A. M. See Maksudov, F. G.
Makarov, V. L. and Samarskiĭ, A. A. *Exact three-point difference schemes for nonlinear ordinary differential equations of second order, and their realization* 495
Makarov, V. L. See Samarskiĭ, A. A.
Makienko, P. M. *Modular groups of some rational functions* 126
Maksudov, F. G. and Khudaverdiev, F. K. *Study of a multidimensional mixed problem for a class of nonlinear hyperbolic equations* 96
Maksudov, F. G., Magerramov, A. M., and Mamedov, M. Z. *The spectral analysis of pencils of differential operators of special form* 16
Malamud, M. M. *Estimates for a system of differential operators in $L_p(\Omega)$. A connection with results of L. Hörmander* 541
Mamedov, M. Z. See Maksudov, F. G.
Maslov, V. P. *On the situation of attractor instability in hydrodynamic turbulence* 128
Matsishin, I. T. See Gorbachuk, M. L.
Meleshko, V. I. *On accelerated regularized methods for computing solutions of nonlinear nonregular equations* 246
Melikyan [Melikian], A. A. *A positional method of singular motion analysis in extremal problems of dynamics* 205
Mkrtchyan, G. A. See Zelinskiĭ, Yu. B.
Mynbaev, K. T. *Cubature formulas for functions in an anisotropic Sobolev-Liouville space with a weight* 182
Nazarov, S. A. and Plamenevskiĭ, B. A. *On radiation conditions for selfadjoint elliptic problems* 274
Neretin, Yu. A. *On operators connecting holomorphic representations of different groups* 547
Nguen Khong Tkhaĭ [Nguyễn Hông Thài] See Zabreĭko, P. P.
Nikol′skiĭ, È. V. *Generalized functionally invariant solutions of a vector equation of potential type* 210
Nikonov, O. I. See Kurzhanskiĭ, A. B.
Novokshenov, V. Yu. *The modulated elliptic function as the solution of Painlevé's second equation in the complex plane* 252
Oleĭnik, O. A. See Kondrat′ev, V. A.

Olevskiĭ, A. M. *On spectrum-preserving approximation* 215
Opershteĭn [Operstein], V. A. *On a constructive characterization of the spaces* $B^{w}_{pq}[-1,1]$ *with the help of approximation by algebraic polynomials* 101
Pechentsov, A. S. *On the traces of higher-order singular differential operators* 551
Pelyukh, G. P. *On solutions, continuous and bounded on the real axis, of systems of nonlinear functional equations* 378
Pergamenshchikov, S. M. See Kabanov, Yu. M.
Petrova, I. V. *Some questions in the theory of* L_2*-approximations on a hyperboloid in* $R^{n,1}$ 70
Plamenevskiĭ, B. A. See Nazarov, S. A.
Prasolov, A. V. *Additivity of strong homology and the continuum hypothesis*.. 133
Prikarpat·skiĭ, A. K. and Bogolyubov, N. N. *A bilocal periodic problem for Sturm-Liouville and Dirac differential operators, and some applications in the theory of nonlinear dynamical systems* 21
Pukhnacheva, T. P. See Romanov, V. G.
Radkevich, E. V. *The operator pencil for the Verigin contact problem* 186
Rashkovskiĭ, A. Yu. *Theorems on compactness of families of subharmonic functions, and majorants of harmonic measures* 460
Romanov, V. G., Kabanikhin, S. I., and Bakanov, G. B. *Investigation of a differential-difference analogue of a three-dimensional problem in integral geometry* 306
Romanov, V. G. and Pukhnacheva, T. P. *Determination of the coefficients of the system of equations of electrodynamics in a class of functions analytic in some of the variables* 417
Rotar′, V. I. See Kir′yanova, L. V.
Rybakov, V. V. *Admissibility of rules of inference with parameters in intuitionistic logic, and intuitionistic Kripke models* 421
Rzhevskiĭ, S. V. *On the structure of the conditional ε-subgradient method for simultaneous solution of the direct and dual convex programming problems* 347
Sabitov, K. B. *Extremal properties of the modulus of solutions of a class of systems of equations of mixed type* 26
Safarov, D. Kh. *Elliptic regularization of systems of partial differential equations of composite type* 219
Salakhitdinov, M. S. and Islomov, B. *On a three-dimensional analogue of the Tricomi problem for an equation of mixed type* 310
Samarskiĭ, A. A. and Makarov, V. L. *On the realization of exact three-point difference schemes for second-order ordinary differential equations with piecewise smooth coefficients* 463
Samarskiĭ, A. A. See Makarov, V. L.
Savastyuk, S. V. See Khrustalev, M. M.
Semenov, A. Yu. See Evseev, E. G.
Serdyukova, S. I. *Quasi-Jordan form for analytic matrices constituting a bounded semigroup* 314
Serov, V. S. *On the Green's function in mathematical scattering theory* 554
Shlyk, V. A. *The geometry of removable sets for the space* FD^p, $p \in (1,+\infty)$, *and Hedberg normal domains* 471
Sibirskiĭ, K. S. See Bularas [Boularas], D.
Sinel′shchikov, S. D. See Golodets, V. Ya.
Sklyar, G. M. See Korobov, V. I.
Smirnov, S. N. See Sverchkov, M. Yu.
Sodin, M. L. See Eremenko, A. È.

Soĭfer, G. A. *Maximal subgroups of infinite index in lattices of semisimple Lie groups* 278
Soldatov, A. P. *The general boundary value problem of order $k-1$ for elliptic equations* 222
———. *A general boundary value problem for elliptic systems* 282
Stepanov, V. D. *On boundedness and compactness of a class of integral operators* 468
Strunkov, S. P. *On a problem of R. Brauer* 30
Sverchkov, M. Yu. and Smirnov, S. N. *Maximal coupling for processes in $D[0,\infty)$* 352
Sychev, A. V. *Coefficients of quasiconformality of a pair of dihedral wedges and cones* 558
Taĭmanov, A. D. and Taĭmanov, V. A. *On the representation of solutions of an equation in a free semigroup without an identity* 435
Taĭmanov, V. A. See Taĭmanov, A. D.
Tavgen′, O. I. *Finite width of arithmetic subgroups of Chevalley groups of rank ≥ 2* 136
Temirgaliev, N. *An application of divisor theory to the approximate recovery and integration of periodic functions of several variables* 160
Tsekanovskiĭ, È. R. See Dovzhenko, I. N.
Vasil′ev, D. G. *Two-term asymptotics of the spectrum of natural frequencies of a thin elastic shell* 108
Vavilov, S. A. *A criterion for solvability of the resonance periodic problem in the theory of nonlinear oscillations* 486
Ven, V. L. and Krysov, Yu. A. *Aggregation and approximation in parametric programming problems* 355
Vladimirov, V. S., Volovich, I. V., and Zelenov, E. I. *Spectral theory in p-adic quantum mechanics, and representation theory* 40
Vlasov, V. V. *On multiple minimality of a part of the system of root vectors of certain operator-valued functions* 45
Vol′berg, A. L. *An inequality of Łojasiewicz for very smooth functions* 170
Volovich, I. V. See Vladimirov, V. S.
Vulpe, N. I. See Bularas [Boularas], D.
Yakubov, A. Ya. See Askhabov, S. N.
Zabreĭko, P. P. and Nguen Khong Tkhaĭ [Nguyễn Hồng Thài] *New theorems on the solvability of operator and integral Hammerstein equations* 404
———. *Duality theory for ideal spaces of vector-valued functions* 363
Zelenov, E. I. See Vladimirov, V. S.
Zelinskiĭ, Yu. B. and Mkrtchyan, G. A. *On extreme points and hypercomplex convex domains* 367
Zhura, N. A. *A nonlocal boundary value problem for the steady-state linearized two-dimensional system of Navier-Stokes equations* 264
Zil′bergleĭt, L. V. and Lychagin, V. V. *Spectral sequences of stable Spencer cohomology for systems of differential equations over characteristic bundles* . 148
Znamenskiĭ, S. V. *Tomography in spaces of analytic functionals* 506
Zubov, V. I. *The asymptotic rest position* 59
